CHALLENGE

Lepivits uses Odoo software to generate their invoices. In parallel, they also use Koala financing services. Having to switch from Odoo to Koala is tedious. They wish to have a single platform for the complete management of their invoicing flow.

SOLUTION

Lepivits opted for a **connector between Koala and Odoo** that allows it to manage all its invoicing flow and financing directly in Odoo. Via **Odoo Apps**, Lepivits downloaded and installed it.

RESULTS

Lepivits can use the factoring features within Odoo. It can then monitor the complete invoice flow and benefit from working capital via Koala.
